

ENVIRONMENTAL DISCLOSURE
for 12 Months Ending September 30, 2000

This Environmental Disclosure Statement is provided for your information in accordance with the Electric Service Customer Choice and Rate Relief law of 1997 and the rules of the Illinois Commerce Commission. The quarterly disclosure provides a breakdown of known sources of electricity and the resulting emissions. The report period for this statement is October 1999 through September 2000.

We are happy to announce that Unicom Energy will now operate as Exelon EnergySM. We are joining forces with Exelon Energy, formerly the unregulated division of PECO Energy Company, to continue to provide electric and natural gas services in deregulated marketplaces.

Unicom Energy supplied all energy deliveries for this reporting period. Unicom Energy was certified to provide you with electric power in September 1999. We have actively participated in consumer education and supply services in Illinois' newly deregulated electric market since January 1999. On October 1, 1999, we proudly provided electric supply service to some of the first retail customers in the restructured Illinois electric market.

As Exelon Energy, we will continue the research to determine the source of the electricity described in this statement as "Unknown resources purchased from other companies." To the extent that we are successful, the source of that electricity will be identified in our next quarterly report.

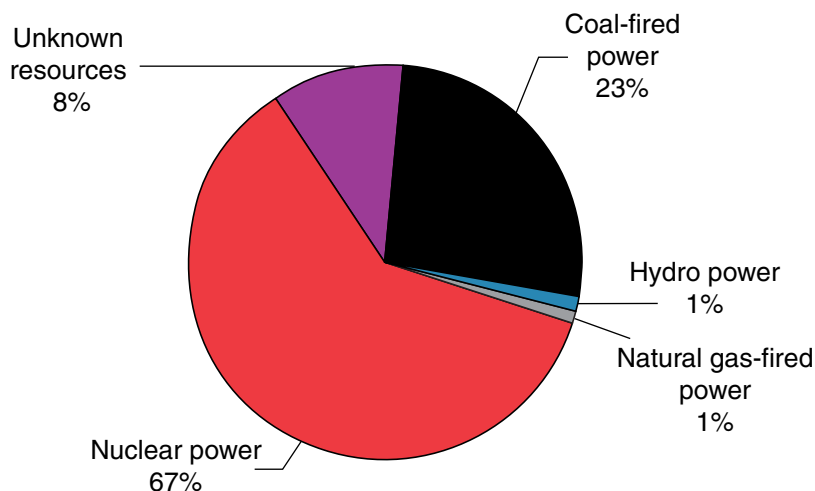

If you have any questions about Exelon Energy's products and services or our ongoing commitment to the marketplace, contact us at:

Exelon Energy
2315 Enterprise Drive
Westchester, IL
Phone: 800-617-8593
Fax: 877-212-2630

The disclosure of this information is required under Section 16-127 of the Electric Service Customer Choice and Rate Relief Law of 1997 and the rules of the Illinois Commerce Commission, 83 Ill. Adm. Code 421.

Sources of Electricity Supplied for the 12 months ending June 30, 2000	Percentage of Total (%)
Biomass power	0
Coal-fired power	23
Hydro power	1
Natural gas-fired power	1
Nuclear power	67
Oil-fired power	0
Solar power	0
Wind power	0
Other resources	0
Unknown resources purchased from other companies	8
TOTAL	100

Sources of Electricity for the 12 months ending September 30, 2000

AVERAGE AMOUNTS OF EMISSIONS and AMOUNT OF NUCLEAR WASTE per 1000 kilowatt-hours (kWh) PRODUCED from KNOWN¹ Sources for the 12 months ending September 30, 2000		
Carbon Dioxide	572.71	lbs.
Nitrogen Oxides	1.50	lbs.
Sulfur Dioxide	2.09	lbs.
High-Level Nuclear Waste	0.00425	lbs.
Low-Level Nuclear Waste	0.00009	ft ³

- 1) 8% of the total electricity supplied was purchased from other suppliers and the amounts of emissions and amount of nuclear waste attributable to producing this electricity is not known and is not included in this table.

Additional information on companies selling electrical power in Illinois may be found at the Illinois Commerce Commission's World Wide Web site (www.icc.state.il.us).
